

## G23(X) SERIES UNITS

G23(X) series units are mid-efficiency upflow gas furnaces manufactured with Durastock™ aluminum steel diamond-plate heat exchangers. G23(X) units are available in heating capacities of 50,000 to 150,000 Btu/h and cooling applications up to 5 tons. Refer to Engineering Handbook for proper sizing.

Units are factory equipped for use with natural gas. A kit is available for conversion to LP/G operation. G23(X)-1, -2, -3 and -4 model units use electronic intermittent pilot ignition. G23(X)-5 and -6 model units feature the Lennox SureLight™ silicon nitride ignition system. All units meet the California Nitrogen Oxides (NO<sub>x</sub>) Standards and California Seasonal Efficiency requirements with the installation of flame baffles. All units use a redundant gas valve to assure safety shut-off as required by A.G.A. or C.G.A.

Information contained in this manual is intended for use by qualified service technicians only. All specifications are subject to change. Procedures outlined in this manual are presented as a recommendation only and do not supersede or replace local or state codes. In the absence of local or state codes, the guidelines and procedures outlined in this manual (except where noted) are recommended only.
