2015 in the subject Business economics Miscellaneous FOM Hochschule f r Oekonomie und Management gemeinn tztige GmbH Hochschulstudienzentrum Freiburg course Management Decision Making language English abstract The most important job of any executive is making decisions It is also the toughest and riskiest job because bad decisions can damage a business and a career in some situations irreparably In many cases these bad decisions occur when alternatives were not clearly defined the right information was not collected the costs and benefits were not accurately weighed or the decision maker himself was sabotaged by the human brain In the present complex environment the executives call for a way to cope with the myriad factors that affect the achievement of goals and the consistency of the judgement the decision makers use to draw valid conclusions Harvard Business Review 2011 p 1 Saaty 2013 p 6 Many difficulties like uncertainty about the future variation of consequences of different actions difficulties because of too few or too many available alternatives and complexity of a decision situation if more factors have to be taken into account make it more important to support the decision makers with procedures and tools that have been developed for a systematic selection of requirements and processing of relevant information The general approach of decision making ranges from the highly complex problems to the relatively simple choices but ensures its applicability and can be helpful in various decisions So it is not only relevant to executives and managers but also to physicians politicians judges and engineers to structure analytical thinking which supports decision making perceived as rational and well founded Eisenfuhr et al 2010 p 3 This assignment introduces different easy to handle decision making techniques that help to decide rather on intuition than on structured analysis and methodical dissection
