The Basics

Mining is very useful and one of the best skills in the world of RuneScape because it is probably the easiest way to make money. Obviously, to increase your mining level, you will need to mine ore from rocks.

All the different ores come from different colored rocks that are roughly based on the ore, e.g. a mithril rock would be blue in color. If you do not know what ore is in a rock you can find out by prospecting it. To do this, right click on the rock and click Prospect. It will then say what ore is in the rock, providing there is one in it.

To mine a rock, click on it while you have a pickaxe in your inventory that you can use, based on the required mining level. As your mining level gets better, getting ore will become quicker and easier.

When you have mined a rock, the ore will disappear and the rock will become a light grey colour. You will have to wait for it to respawn before you can mine it again. Rocks that are harder to mine take longer to respawn, e.g. Runite will take the longest to respawn. Another thing that affects respawn time is how busy the world is: the more people logged in, the faster the respawn time.
