

## Act 4

1. How do the witches lull Macbeth into a false sense of security? The witches cast a charm and the apparitions convince Macbeth he is invulnerable because he believes no one, except Macduff, can harm him – a man not born of a woman does not exist and trees cannot march three miles to Dunsinane.
2. How does Macbeth feel after his second meeting with the witches? What things might reassure him, and what things might trouble him? The riddles reassure him of his invincibility, but the warning of Macduff and the image of Banquo as the ancestor of a great line of kings disturbs Macbeth.
3. When Macbeth says (Act 4, scene 1) that “the flighty purpose never is o’ertook/Unless the deed go with it”, what does he mean in general, and in the particular situation in which he says it? “The fleeting plan is never fulfilled unless it is carried out at once.” He refers to hearing the news that Macduff has gone to England to raise an army to attack Macbeth. His actions now seem to be impulsive, not deliberate or cautious.
4. How does Lady Macduff feel about her husband’s leaving her alone? Why has he done this? Lady Macduff accuses her husband of not loving his family enough and she says she and her children are abandoned. Macduff has fled for a higher purpose though. He is trying to save his country from a murderous tyrant.
5. When Ross comes to see Lady Macduff, how does he behave and why? Ross says that Scotland is in a state of chaos – “Float upon a wild and violent sea” – and he is nervous to leave as quickly as he can.
6. Briefly explain Macduff’s description to Malcolm of the state of affairs in Scotland (Act 4, scene 3). What does

The chapters in this volume are testament to the  
many ways in which Robert Bjork s ideas have shaped the course of research on human memory over four decades It  
showcases the theoretical advances and recent findings by researchers whose work and careers have been influenced by  
Bjork The first group of chapters explore the idea that forgetting is an adaptive response to the demands of a retrieval system  
fraught with competition an idea that has helped recalibrate conceptualizations of memory away from one in which in which  
the computer is the dominant metaphor Several chapters then review the application of research on learning and memory to  
enhancing human performance reflecting Bjork s staunch commitment to translating his findings and theories to real world  
settings Later chapters address topics that are relevant to the translation of cognitive psychology to human performance and  
in particular recognize the critical role of metacognition in such problems The final chapters cover a variety of issues related  
to how remembering can be enhanced and how research on remembering can be profitably guided by the use of  
mathematical modeling This volume will appeal to researchers and graduate students of human learning memory and  
forgetting and will also benefit an audience working in applied domains such as training and education      **Mosher's
