ACTIVITY 1: GUIDE QUESTION

2. One good way for geologists to find ore bodies is by studying the Earth's features. They collect samples, use technology like drones, and look at past mining records. They also create models to predict where ore might be. Plus, they make sure it's worth mining economically. So, they use a mix of science, data, and history to locate ore bodies effectively.

3. Geologists prefer core samples over cutting mountains open to find ore minerals because it's less harmful to the environment, costs less, and is safer. Core samples give them the information they need without causing big disruptions.
