Chandelle is a maximum performance climbing turn through 180 degrees while maintaining a constant turn rate. The turns (first and second half) need to be kept coordinated by applying the right amount of rudder. A Chandelle to the left is quite different than one to the right because of the ever increasing amount of P-factor in the second half of the maneuver. Huge amount of right rudder is needed during the second half of the maneuver, and at the 180° point, because all left turning tendencies will be in full force.
