Smart Learning with Educational Robotics Linda Daniela, 2019-06-28 This book will offer ideas on how robots can be used as teachers' assistants to scaffold learning outcomes where the robot is a learning agent in self-directed learning who can contribute to the development of key competences for today's world through targeted learning such as engineering thinking, math, physics, computational thinking, etc. starting from pre-school and continuing to a higher education level. Robotization is speeding up at the moment in a variety of dimensions both through the automation of work by performing intellectual duties and by providing support for people in everyday situations. There is increasing political attention especially in Europe on educational systems not being able to keep up with such emerging technologies and efforts to rectify this. This edited volume responds to this attention and seeks to explore which pedagogical and educational concepts should be included in the learning process so that the use of robots is meaningful from the point of view of knowledge construction and so that it is safe from the technological and cybersecurity perspective.

Hispanic Serving Institutions (HSIs) in Practice Gina Ann Garcia, 2020-03-01 As the general population of Latinxs in the United States burgeons, so does the population of college-going Latinx students. With more Latinxs entering college, the number of Hispanic Serving Institutions (HSIs), which are not-for-profit degree-granting postsecondary institutions that enroll at least 25% Latinxs, also grows. With 523 institutions now meeting the enrollment threshold to become HSIs, but as they increase in number, the question remains: What does it mean to serve Latinx students? This edited book, *Hispanic Serving Institutions: HSIs in Practice: Defining Servingness at HSIs*, fills an important gap in the literature. It features the stories of faculty staff and administrators who are defining servingness in practice at HSIs. Servingness is conceptualized as the ability of HSIs to enroll and educate

Latinx students through a culturally enhancing approach that centers Latinx ways of knowing and being with the goal of providing transformative experiences that lead to both academic and non academic outcomes In this book practitioners tell their stories of success in defining servingness at HSIs Specifically they provide empirical and practical evidence of the results and outcomes of federally funded HSI grants including those funded by Department of Education Title III and V grants This edited book is ideal for higher education practitioners and scholars searching for best practices for HSIs in the United States Administrators at HSIs including presidents provosts deans and boards of trustees will find the book useful as they seek out ways to effectively serve Latinx and other minoritized students Faculty who teach in higher education graduate programs can use the book to highlight practitioner engaged scholarship Legislators and policy advocates who fight for funding and support for HSIs at the federal level can use the book to inform and shape a research based Latinx educational policy agenda The book is essential as it provides a framework that simplifies the complex phenomenon known as servingness As HSIs become more significant in the U S higher education landscape books that provide empirically based practical examples of servingness are necessary
