The Use of Dispersants in Marine Oil Spill Response National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Ocean Studies Board, Committee on the Evaluation of the Use of Chemical Dispersants in Oil Spill Response, 2020-04-24 Whether the result of an oil well blowout vessel collision or grounding leaking pipeline or other incident at sea each marine oil spill will present unique circumstances and challenges The oil type and properties location time of year duration of spill water depth environmental conditions affected biomes potential human community impact and available resources may vary significantly Also each spill may be governed by policy guidelines such as those set forth in the National Response Plan Regional Response Plans or Area Contingency Plans To respond effectively to the specific conditions presented during an oil spill spill responders have used a variety of response options including mechanical recovery of oil using skimmers and booms in situ burning of oil monitored natural attenuation of oil and dispersion of oil by chemical dispersants Because each response method has advantages and disadvantages it is important to understand specific scenarios where a net benefit may be achieved by using a particular tool or combination of tools This report builds on two previous National Research Council reports on dispersant use to provide a current understanding of the state of science and to inform future marine oil spill response operations The response to the 2010 Deepwater Horizon spill included an unprecedented use of dispersants via both surface application and subsea injection The magnitude of the spill stimulated interest and funding for research on oil spill response and dispersant use in particular This study assesses the effects and efficacy of dispersants as an oil spill response tool and evaluates trade offs associated with dispersant use

Essentials of Bioinformatics, Volume II Noor Ahmad Shaik, Khalid Rehman Hakeem, Babajan Banaganapalli, Ramu Elango, 2019-10-18 Bioinformatics is an integrative field of computer science genetics genomics proteomics and statistics which has undoubtedly revolutionized the study of biology and medicine in past decades It mainly assists in modeling predicting and interpreting large multidimensional biological data by utilizing advanced computational methods Despite its enormous potential bioinformatics is not widely integrated into the academic curriculum as most life science students and researchers are still not equipped with the necessary knowledge to take advantage of this powerful tool Hence the primary purpose of our book is to supplement this unmet need by providing an easily accessible platform for students and researchers starting their career in life sciences This book aims to avoid sophisticated computational algorithms and programming Instead it focuses on simple DIY analysis and interpretation of biological data with personal computers Our belief is that once the beginners acquire these basic skillsets they will be able to handle most of the bioinformatics tools for their research work and to better understand their experimental outcomes Our second title of this volume set In Silico Life Sciences Medicine provides hands on experience in analyzing high throughput molecular data for the diagnosis prognosis and treatment of monogenic or polygenic human diseases The key concepts in this volume include risk factor assessment

genetic tests and result interpretation personalized medicine and drug discovery This volume is expected to train readers in both single and multi dimensional biological analysis using open data sets and provides a unique learning experience through clinical scenarios and case studies

The European Union in the 21st Century Nikolaos Zahariadis, 2023-08-24 The European Union in the 21st Century takes a fresh look at a complex and ever changing organization by examining its pursuit of two very different objectives power security and political weight and plenty economic growth and social welfare Nikolaos Zahariadis aims to help students understand these two objectives and how the tension between them affects different issue areas illuminating how each objective represents a different perspective on what the EU is and what it does The book also introduces students to the systematic thinking that political scientists employ to see the connections between policies institutions and actors By unpacking the various perspectives students will gain greater insight into how policymakers think and why EU leaders make the kinds of decisions they do
