The Price of Everything Eduardo Porter,2011-01-04 Everything has a price but it isn't always obvious what that price is Many of the prices we pay seem to make little sense We shell out 2.29 for a coffee at Starbucks when a nearly identical brew can be had at the corner deli for less than a dollar We may be less willing to give blood for 25 than to donate it for free Americans hire cheap illegal immigrants to fix the roof or mow the lawn and vote for politicians who promise to spend billions to keep them out of the country And citizens of the industrialized West pay hundreds of dollars a year in taxes or cash for someone to cart away trash that would be a valuable commodity in poorer parts of the world The Price of Everything starts with a simple premise there is a price behind each choice that we make whether we're deciding to have a baby drive a car or buy a book We often fail to appreciate just how critical prices are as a motivating force shaping our lives But their power becomes clear when distorted prices steer our decisions the wrong way Eduardo Porter uncovers the true story behind the prices we pay and reveals what those prices are actually telling us He takes us on a global economic adventure from comparing the relative price of a vote in corrupt So Tom and in the ostensibly uncorrupt United States to assessing the cost of happiness in Bhutan to deducing the dollar value we assign to human life His unique approach helps explain Why polygamous societies actually place a higher value on women than monogamous ones Why someone may find more value in a 14 million license plate than the standard issue 95 one Why some government agencies believe one year of

life for a senior citizen is four times more valuable than that of a younger person Porter weaves together the constant and often unconscious cost and value assessments we all make every day While exploring the fascinating story behind the price of everything from marriage and death to mattresses and horsemeat Porter draws unexpected connections that bridge a wide range of disciplines and cultures The result is a cogent and insightful narrative about how the world really works Watch a Video *Civic Engagement in Food System Governance* Alan R. Hunt,2015-10-05 The local food movement is one of the most active of current civil engagement social movements This work presents primary evidence from over 900 documents interviews and participant observations and provides the first descriptive history of local food movement national policy achievements in the US from 1976 to 2013 and in the UK from 1991 to 2013 together with reviews of both the American and British local food movements It provides a US UK comparative context significantly updating earlier comparisons of American British and European farm and rural policies The comparative perspective shows that over time more effective strategies for national policy change required social movement building strategies such as collaborative policy coalitions capacity building for smaller organizations and policy entrepreneurship for joining together separate rural farming food and health interests In contrast narrowly defined single issue campaigns often undermined long term policy change even if short term wins emerged By profiling interviews of American and English movement leaders policymakers and funders the book demonstrates that democratic participation in food policy is best supported when funders incentivize groups to work together and overcome their differences
