The Status of Religion and the Public Benefit in Charity Law Barry W. Bussey, 2020-02-29 The Status of Religion and the Public Benefit in Charity Law is an apologetic for maintaining the presumption of public benefit for the charitable category advancement of religion in democratic countries within the English common law tradition In response to growing academic and political pressure to reform charity law including recurring calls to remove tax exemptions granted to religious charities the scholars in this volume analyse the implications of legislative and legal developments in Canada the UK Australia New Zealand and South Africa In the process they also confront more fundamental sociological or philosophical questions on the very nature and role of religion in a secular society that would deny any space for religious communities outside their houses of worship In other words this book is concerned with the place of religion and religious institutions in contemporary society It represents a series of concerns about the proper role of the state in relation to the differing beliefs of citizens some of which will quite rightly manifest in actions to benefit the wider society This debate then naturally engages with broader issues related to secularism civic engagement and liberal democratic freedoms

Migration Law in Greece Konstantinos D. Magliveras, 2025-09-26 Derived from the renowned multi volume International Encyclopaedia of Laws this monograph on the rules on immigration and right of residence of non nationals in Greece examines the legal and administrative conditions for persons not having the citizenship of a State to enter the country and to stay and reside there It provides a survey of the

subject that is both usefully brief and sufficiently detailed to answer most questions likely to arise in any pertinent legal setting. It follows the common structure of all monographs appearing in the International Encyclopaedia for Migration Law, thus allowing easy comparison between the country studies. As migration and economic activities are often interlinked, the analysis pays particular attention to labour market access and regulation of self-employed activities for non-nationals. The book describes the status of such specific categories of persons as students, researchers, temporary workers, and asylum seekers, as well as the position of family members, detailing applicable legislation and providing practical information on administrative procedures, sanctions, and legal remedies and guarantees. The impact of international human rights law and various bilateral and multilateral agreements is considered along with the broader application of national and local law to non-citizens in such areas as family relations, labour, social security, and education. Lawyers, scholars, practitioners, policymakers, government administrations, and non-governmental organizations involved in the development, practice, and study of migration law will find this book indispensable. It will be welcomed by lawyers representing parties with interests in Greece and immigration specialists in both public and private organizations. Academics and researchers also will appreciate its value in the study of comparative trends and harmonization initiatives affecting migrants.
