Before the 1990s, most of the literature on organizational identity focused on how it was created and maintained. In contrast, in the 1990s, the focus shifted to the role of identity in organizational behavior and performance. This shift was largely due to the work of Whetten and MacLean (1999), who argued that organizational identity is a key factor in organizational success. They suggested that organizations should focus on creating a strong identity that is consistent with their mission and values. This idea has been widely adopted and has led to a growing body of research on organizational identity and its impact on organizational behavior and performance.
