Handbook on Climate Change and Technology Frauke Urban, Johan Nordensvärd, 2023-12-11 This timely Handbook presents the latest knowledge on technological innovation for climate change mitigation and adaptation Looking beyond technical fixes it further draws on economics politics and sociology to explore how modern technology can contribute to effective and socially just sustainability transitions

The Business Student's Guide to Sustainable Management Petra Molthan-Hill, 2017-11-30 Aimed at undergraduates this is the first textbook to offer a full introduction to sustainable management covering all subject areas relevant to business students The book includes chapters and seminars on subjects such as Corporate Sustainable Strategy Sustainable Marketing Sustainability Reporting Supply Chain Management Human Resources Management Supporting Sustainable Business Environmental Economics Sustainable Operations Management Greenhouse Gas Management and System Thinking in Sustainable Management The book contains nearly 30 ready made seminars employing various teaching methods Each chapter follows the same easy to use format This book provides a true treasure chest of materials to support staff wanting to integrate sustainability into their teaching and provides support to effectively embed sustainability in the curriculum The chapters also offer a starting point in developing teaching units for Masters and MBA students The material is not just useful to people in business schools but to those involved in wider scale curriculum change and those looking to make links between different disciplines

Gender and Climate Change Joane Nagel, 2025-08-05 Does gender matter in global climate change This timely and provocative book takes readers on a guided tour of basic climate science then holds up a gender lens to find out what has been overlooked in popular discussion research and policy debates We see that around the world more women than men die in climate related natural disasters the history of science and war are intimately interwoven masculine occupations and preoccupations and conservative men and their interests drive the climate change denial machine We also see that climate policymakers who embrace big science approaches and solutions to climate change are predominantly male with an ideology of perpetual economic growth and an agenda that marginalizes the interests of women and developing economies The book uses vivid case studies to highlight the often surprising gendered impacts of climate changes This new edition is a thorough update that includes revised and new chapters and new material that takes account of the significant advances in climate research environmental and social theory and the many political and social challenges posed in the wake of US elections Covid 19 pandemic and rapidly changing climate and environment The new edition also takes account of important social and cultural movements that resist challenges to women's rights and advocate for gender sexuality and racial justice This book will appeal to students researchers and academicians interested in environmental studies and gender studies It also will be of interest to policymakers activists and others involved with environmental policy and governance

Food Consumption in the City Marlyne Sahakian, Czarina Saloma, Suren Erkman, 2016-10-04 Food consumption patterns and practices are rapidly changing

in Asia and the Pacific and nowhere are these changes more striking than in urban areas This book brings together scholars from anthropology sociology environmental studies tourism architecture and development studies to provide a comprehensive examination of food consumption trends in the cities of Asia and the Pacific including household food consumption eating out and food waste The chapters cover different scales of analysis from household research to national data and combine different methodologies and approaches from quantifiable data that show how much people consume to qualitative findings that reveal how and why consumption takes place in urban settings Detailed case studies are included from China India Japan Malaysia Philippines South Korea and Vietnam as well as Hawai i and Australia The book makes a timely contribution to current debates on the challenges and opportunities for socially just and environmentally sound food consumption in urbanizing Asia and the Pacific Chapter 3 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 3 0 https://s3.us-west-2.amazonaws.com/tandfbis-rt-files/docs/Open+Access+Chapters/9781138120617_oachapter3.pdf Water and Cities in Latin America Ismael Aguilar-Barajas,Jürgen Mahlknecht,Jonathan Kaledin,Marianne Kjellén,Abel Mejía-Betancourt,2015-05-08 Approximately 80 per cent of the population of Latin America is concentrated in urban centres Pressure on water resources and water management in cities therefore provide major challenges Despite the importance of the issues there has been little systematic coverage of the topic in book form This work fills a gap in the literature by providing both thematic overviews and case study chapters It reviews key aspects of why water matters in cities and presents case studies on topics such as groundwater management green growth and water services inequalities in water supply the financing of water services and flood management Detailed examples are described from Argentina Brazil Colombia Ecuador Mexico and Peru and there is also a chapter comparing lessons which might be learnt from US cities Contributing authors are drawn from both within and outside the region including from the Inter American Development Bank OECD and World Bank to set the issues in a global context Tailings Management Handbook Kimberly Finke Morrison,2022-02-01 As long as we have mining and mineral processing tailings and the responsible management thereof will remain at the forefront with a company s environmental social and governance ESG performance in part a reflection of how well tailings risks are being managed The Global Industry Standard on Tailings Management GISTM was published in August 2020 aiming to prevent catastrophic failure of tailings facilities by providing operators with specified measures and approaches throughout the mine life cycle taking into account multiple stakeholder perspectives In 2021 the International Council on Mining Metals ICMM published the Tailings Management Good Practice Guide intended to support safe responsible management of tailings across the global mining industry providing guidance on good governance and engineering practices to support continual improvement in tailings storage facility TSF management and help foster and strengthen the safety culture of mining companies The Tailings Management Handbook is important and timely because there is no other comprehensive resource rooted in these new

fundamentals and global principles for tailings management Tailings management requires interdisciplinary and cross functional understanding and support which is apparent throughout this handbook Dive into the wealth of information contributed by more than 100 world renowned experts beautifully crafted into a full color handbook that focuses on the basics life cycle planning site and tailings characterization TSF design and construction as well as systems and operations of TSFs The inclusion of 42 case studies is an added plus with real world successes and lessons learned River Flow 2020 Wim Uijttewaal,Mário J. Franca,Daniel Valero,Victor Chavarrias,Clàudia Ylla Arbós,Ralph Schielen,Alessandra Crosato,2020-08-27 Rivers form one of the lifelines in our society by providing essential services such as availability of fresh water navigation energy ecosystem services and flood conveyance Because of this essential role mankind has interfered continuously in order to benefit most and at the same time avoid adverse consequences such as flood risk and droughts This has resulted in often highly engineered rivers with a narrow set of functions In the last decades rivers are increasingly considered in a more holistic manner as a system with a multitude of interdependent processes River research and engineering has therefore added to the river fundamentals also themes like ecohydraulics consequences of climate change and urbanisation River Flow 2020 contains the contributions presented at the 10th conference on Fluvial Hydraulics River Flow 2020 organised under the auspices of the Committee on Fluvial Hydraulics of the International Association for Hydro Environment Engineering and Research IAHR What should have been a lively physical gathering of researchers students and practitioners was converted into an online event as the COVID 19 pandemic hindered international travelling and large gatherings of people Nevertheless the fluvial hydraulics community showed their interest and to be very much alive with a high number of participations for such event Since its first edition in 2002 in Louvain la Neuve this series of conferences has found a large and loyal audience in the river research and engineering community while being also attractive to the new researchers and young professionals This is highlighted by the large number of contributions applying for the Coleman award for young researchers and also by the number of applications and attendants to the Master Classes which are aimed at young researchers and students River Flow 2020 aims to provide an updated overview of the ongoing research in this wide range of topics and contains five major themes which are focus of research in the fluvial environment river fundamentals the digital river the healthy river extreme events and rivers under pressure Other highlights of River Flow 2020 include the substantial number of interdisciplinary subthemes and sessions of special interest The contributions will therefore be of interest to academics in hydraulics hydrology and environmental engineering as well as practitioners that would like to be updated about the newest findings and hot themes in river research and engineering *Decision Making in Water Resources Policy and Management* Barry Hart,Jane Doolan,2017-05-19 Decision Making in Water Resource Policy and Management An Australian Perspective presents the latest information in developing new decision making processes Topics covered include key aspects of water resources planning recent water resource policy changes in irrigation urban and environmental

considerations the evolution of a water market a number of case studies that provide real examples of improved decision making transfer of the Australian experience overseas and challenges for the future Many countries are experiencing major water scarcity problems which will likely intensify with the continued impacts of climate change In response to this challenge there is increased worldwide focus on the development of more sustainable and integrated water resource policies The Australian experience over the past three decades has led to major improvements in the decision making processes in water resources policy and management particularly in response to drought and climate change providing a great model on which other nations can use and adapt This information is essential to early to mid career practitioners engaged in policy planning and operational roles in all fields of water resource policy and management and catchment management Summarizes key results from three decades of changes in Australian water resource policy Illustrates how Australian knowledge is being used in other countries and how this might be expanded Provides international practitioners with real examples of where and how the Australian knowledge is assisting in other situations
