Jose Manuel Oliver Frade:

Managing Emotions in the Middle Ages ,2025-01-27 The life experiences of men and women take on meaning through the emotionality they entail and the intensity of these experiences build certain memories which link the individuals within a society As such this volume argues that examining the management of emotions in late medieval society will allow us to better understand it By discussing theoretical frameworks for the historical study of emotions and presenting a range of case studies from the Middle Ages the authors of this book illustrate how the management of emotions reflects and sheds light on the code of values and behaviour that guided this society Contributors are Maravillas Aguiar I aki Baz n Anna Caiozzo Carla Casagrande Riccardo Cristiani Vincent Debiais Jonas Holst Eduard Juncosa Andrea Knox Mauricio Molina Miguel ngel Motis Josep Maria Ruiz Simon Flocel Sabat Karen St ber William Marx Barbara H Rosenwein Alberto Velasco and Alexandra Velissariou

Discourse Dynamics Sara Sanchez,2010-09-13 This volume presents a reasoned study of the discourse connectives of attainment of the French language For the most part the studies on connectives are based on referentialist descriptive frameworks which are sustained more or less explicitly on what we have called the general problem of causality the epistemological foundation of a scientific paradigm which has been used for centuries but which in our opinion is now outdated In the first place we have submitted this old paradigm to critical debate showing the limits of its scientific validity Next we have placed ourselves in a non referentialist linguistic framework the Theory of Argumentation in the Language System developed by the French linguist Oswald Ducrot in which we have formulated a new descriptive proposal for discourse connectives taking into account both the argumentative configuration and the polyphonic configuration of each of the discourse dynamics generated around a given connective We have described the argumentative configuration in terms of semantic blocks and the polyphonic configuration in terms of discourse algorithms original and innovative heuristic instruments with which we attempt to stimulate a new approach to language more in line with the general scientific approaches of the 21st century and with the new scientific paradigm which is currently valid *Bulletin Bibliographique de la Société Internationale Arthurienne* International Arthurian Society,2008 **Canarias, otra mirada.
