Combining ITIL and Lean. The pursuit of perfection through continuous improvement Alexandra Arbter,2022-11-11 Master s Thesis from the year 2015 in the subject Business economics Business Management Corporate Governance grade 1 University of Applied Sciences Burgenland Department Information Technology and Information Management language English abstract An increasing competitive market in service businesses is driving multinational corporations MNCs to implement business improvement

philosophies and methodologies in order to address customer requirements for better quality service and organizational demands for rising profit margins through cost reduction The Information Technology Infrastructure Library ITIL has been implemented by various MNCs in full or as per business requirements in order to manage and control their processes more effectively However due to dynamic economic influences in recent year s these companies require to step up in their ability to become more agile and continuously improve their processes in order to react in an agile way to shifting market demands Although ITIL stands for a framework of best practices it neglects a clear customer value proposition and provides only limited significance towards change Lean on the other hand is a management methodology that has been suggested as a means to resolve these problems by reducing costs increase productivity and becoming more agile within daily business routines Lean s application within ITIL is becoming progressively popular among researchers but despite the application of Lean approaches to different contexts within manufacturing industries the specifics of Information Technology Service Management ITSM in the services industries remains largely untested Focus of this study is worldwide the service delivery industry of MNCs which present complex process driven industries The aim is to determine in which relation or what kind of potential there is for a hybrid ITIL seven step improvement process and Lean model in order to accomplish a more agile continual service improvement approach
