governments to their will and destroy barriers to the free movement of capital And while military force continues to play an important role in imperial strategy it is the discipline of the global market that keeps workers in check by pitting them against each other no matter what their national origin This is a world in which the so called OC labor aristocraciesOCO of the rich nations are demolished the power of states to enforce checks on capital is sapped and global firms are free to pursue their monomaniacal quest for profits unfettered by national allegiance Screpanti delves into the inner workings of global imperialism explaining how it is different from past forms of imperialism how the global distribution of wages is changing and why multinational firms have strained to break free of national markets He sees global imperialism as a developing process one with no certain outcome But one thing is clear when economic crises become opportunities to discipline workers and when economic policies are imposed through increasingly authoritarian measures the vision of a democratic and humane world is what is ultimately at stake

Reforming WTO Rules on State-Owned Enterprises Yingying Wu,2019-01-28 This book argues that the trade distorting effects of advantages associated with SOEs are more severe from

an economic perspective and the behavior of SOEs after receiving advantages is of more concern compared to private owned enterprises POEs The premise is that the existence of SOEs per se is not the essential problem rather the underlying problems are i the disproportionate granting of advantages to SOEs compared to POEs and ii the behavior of SOEs once they receive advantages The book offers a systematic analysis focusing on the various advantages granted to SOEs and their subsequent behavior Its detailed analysis reveals the inadequacy of current WTO rules and is complemented by a number of concrete proposals
