Manual On Policies And Procedures For Purchase Of Goods 2006:

Public Procurement Policy Gustavo Piga, Tunde Tatrai, 2015-07-24 Appropriate laws and regulations are an essential tool to direct the action of procurers toward the public good and avoid corruption and misallocation of resources. Common laws and regulations across regions, nations, and continents potentially allow for the further opening of markets and ventures to newcomers and new ideas to satisfy public demand. This book collects original contributions from both economists and lawyers related to the new European Union Directives just approved in 2014 by the EU Parliament. Uniquely, this book combines juridical and technical expertise so as to find a common terrain and language to debate the specific issues that a Public Administration in need of advancing and modernizing has to face. This format features for each section an introductory exchange between two experts of different disciplines made of a series of sequential interactions between an economist and a lawyer that write and follow up on one another. This is to enrich the liveliness of the debate and improve the mutual understanding between the two professions. There are four sections characterized in this book supporting social considerations via public procurement, green public procurement, innovation through innovative partnerships, and lots of the Economic and Legal Challenges of Centralized Procurement. This book will be of interest to policy makers, practitioners working in the field of EU public procurement, as well as academics.

Contemporary changes in law and policy at the global level to efficiently answer to environmental and social issues correspond to the traditional approach of limiting the regulatory and policy changes to a singular field or discipline tackling the inherent unsustainability of corporate laws or incentivising the offering of sustainable finance to stimulate the transition towards sustainable practices This book provides a new viewpoint and approach of simultaneously regulating seemingly non connected fields in order to provide a fertile ground for a truly organic change towards sustainable outcomes It addresses diverse questions of sustainable transition of the three specific fields to support sustainable practices in public procurement private market transaction and in educating future business leaders and legal experts by incorporating sustainable concerns as the underlying guiding principles of their conduct It translates scientific findings into a practical format that can be used by diverse stakeholders searching for information and solutions in their respective professional fields The underlying assumption is that a simultaneous action in the three respective fields of public procurement corporate law and higher education brings about more coherent and interconnected results that incentivise further action and changes towards sustainable practices The book furthers the idea of policy coherence by building upon the findings in the field of public procurement corporate law and practice and higher education curricula By identifying the barriers in the three respective fields for sustainable action and proposing solutions for either eliminating or minimising those barriers at the EU level the book calls for further changes in the respective fields as well as for considering the spillover effects of these policies on other fields **Single Audit Report for the Year Ended ...** Georgia,2005
