

BATTERY SPECIFICATIONS

Type designation	YB141-B2 or FB141-B2
Capacity	12V, 50.4 kC (14 Ahg/10HR)
Standard electrolyte S.G.	1.28 at 20°C (68°F)

In fitting the battery to the motorcycle, connect the breather hose to the battery vent.

INITIAL CHARGING

Filling electrolyte

Remove the short sealed tube before filling electrolyte. Fill the battery with electrolyte (dilute sulfuric acid solution with acid concentration of 35.0% by weight, having a specific gravity of 1.28 at 20°C (68°F) up to indicated MAX. LEVEL. Electrolyte should be always cooled below 30°C (86°F) before filling into battery. Leave battery standing for half an hour after filling. Add additional electrolyte if necessary. Charge battery with current as described in the tables shown below.

Maximum charging current: 1.4A (Sealed tube Ⓐ)

Charging time

The charging time for a new battery is determined by the number of months that have elapsed since the date of manufacture.

Confirmation for date of manufacture

Date of manufacture is indicated by a three-part number Ⓐ, as shown in the photograph, each indicating month, date and year.

Near the end of charging period, adjust the specific gravity of electrolyte to value specified. After charging, adjust the electrolyte level to the MAX. LEVEL with DISTILLED WATER.

SERVICING

Visually inspect the surface of the battery container. If any signs of cracking or electrolyte leakage from the sides of the battery have occurred, replace the battery with a new one.

If the battery terminals are found to be coated with rust or an acidic white powdery substance, then this can be cleaned away with sandpaper.

Check the electrolyte level and add distilled water, as necessary to raise the electrolyte to each cell's MAX. level.

Check the battery for proper charge by taking an electrolyte S.G. reading. If the reading is 1.22 or less, as corrected to 20°C (68°F), it means that the battery is still in a run-down condition and needs recharging.

NOTE:

First, remove the Ⓐ lead wire.

Months after manufacturing	Within 6	Within 9	Within 12	Over 12
Necessary charging hours	20	30	40	60

Manual Program Katana :

Programming WCF Services Juval Löwy, Michael S. Montgomery, 2007 Written by Microsoft software legend Juval Löwy Programming WCF Services is the authoritative introduction to Microsoft's new and some say revolutionary unified platform for developing service oriented applications SOA on Windows. Relentlessly practical, the book delivers insight, not documentation, to teach developers what they need to know to build the next generation of SOAs. Not only will this book make you a WCF expert, it will deliver techniques and guidance to become a better software engineer. It's the Rosetta Stone of WCF.

Flying Magazine, 1996-08 **FAR/AIM**, Federal Aviation Administration (FAA) Staff, 1999 Security-Aware Systems Applications and Software Development Methods Khan, Khaled M., 2012-05-31 With the prevalence of cyber crime and cyber warfare, software developers must be vigilant in creating systems which are impervious to cyber attacks. Thus, security issues are an integral part of every phase of software development and an essential component of software design. *Security-Aware Systems Applications and Software Development Methods* facilitates the promotion and understanding of the technical as well as managerial issues related to secure software systems and their development practices. This book targeted toward researchers, software engineers, and field experts outlines cutting edge industry solutions in software engineering and security research to help overcome contemporary challenges. **Cycle World Magazine**, 2001-01 **Black Belt**, 1977-08
