Ontologies for Agents: Theory and Experiences Valentina Tamma,Stephen Cranefield,Timothy W. Finin,Steven Willmott,2006-03-30 There is a growing interest in the use of ontologies for multi agent system applications On the one hand the agent paradigm is successfully employed in those applications where autonomous loosely coupled heterogeneous and distributed systems need to interoperate in order to achieve a common goal On the other hand ontologies have established themselves as a powerful tool to enable knowledge sharing and a growing number of applications have benefited from the use of ontologies as a means to achieve semantic interoperability among heterogeneous distributed systems In principle ontologies and agents are a match made in heaven that has failed to happen What makes a simple piece of software an agent is its ability to communicate in a social environment to make autonomous decisions and to be proactive on behalf of its user Communication ultimately depends on understanding the goals preferences and constraints posed by the user Autonomy is

the ability to perform a task with little or no user intervention while proactiveness involves acting autonomously with no need for user prompting. Communication but also autonomy and proactiveness depend on knowledge. The ability to communicate depends on understanding the syntax, terms and structure and the semantics of a language. Ontologies provide the terms used to describe a domain and the semantics associated with them. In addition, ontologies are often complemented by some logical rules that constrain the meaning assigned to the terms. These constraints are represented by inference rules that can be used by agents to perform the reasoning on which autonomy and proactiveness are based.

Peugeot 205 T16 Group B Rally Car Enthusiast's Manual Nick Garton, 2020-04-14 The Peugeot 205 T16 is the legendary Group B turbocharged four wheel drive rally car produced by Peugeot between 1984 and 1986. Between 1984 and 1986 205 T16s won 16 World Championship rallies in the hands of Ari Vatanen, Timo Salonen, Juha Kankkunen and Bruno Saby and lifted both the manufacturers and drivers titles in 1985 and 1986 in the hands of Timo Salonen and Juha Kankkunen respectively against strong opposition from Audi, Lancia, Ford and Austin Rover. The car was used to extraordinary effect by Peugeot as a marketing tool for the 205 road car and the project lifted Peugeot to become a mainstream manufacturer to rival the established brands worldwide. The original 205 T16 appeared on the rally stages in 1984 while the revised E2 was introduced partway through 1985. The E2 incorporated various revisions raising power output to 550bhp. After the cancellation of Group B at the end of 1986 Peugeot modified three 205 T16 cars to compete in the famous Pikes Peak Hillclimb and later cars were modified to compete in the Paris Dakar rally winning in 1987 and 1988. The car also formed the basis of the 405 T16 which won the Paris Dakar for Peugeot in 1989 and 1990. Today the appearance of 205 T16s is always eagerly anticipated at historic rally events and motorsport retrospectives such as the Goodwood Festival of Speed.

Peugeot 205 T16 Group B Rally Car Enthusiast's Manual chronicles the design, anatomy and operation of the 205 T16 with input from many of the drivers and engineers involved.
