January 2014 C2 Paper International:

European Space Policy Thomas Hoerber, Paul Stephenson, 2015-09-25 Space policy is at the cutting edge of current EU policy developments and is a fascinating object of study involving multiple and diverse actors. It is also an original and contemporary lens for studying European policy making. This book explores advances in European space policy and their significance for European integration. Using a framing methodology, it addresses central questions in European studies in order to form an interdisciplinary bridge between current research in space policy and contemporary European political studies. It assesses the interests of EU institutions in space and how these institutions perceive space policy. Furthermore, it demonstrates that space is a cross-cutting policy domain affecting a diverse range of EU policy fields such as security, transport, and migration, and underpinning the 21st-century European and global economy. In doing so, this volume firmly locates space policy in the field of European Studies. This innovative volume will be of key interest to students and scholars of a range of policy areas including common foreign and security policy, technology policy, transport policy, internal market policies, environmental policy, development aid, and disaster risk management, as well as the EU institutions. **Indonesia's Ascent** C. Roberts, A. Habir, L. Sebastian, 2015-03-10 This volume explores the domestic and transnational considerations associated with Indonesia's ascent, referring to its rise in terms of hard and soft power and its likely trajectory in the future. The range of contributors analyse economic resources, religious harmony, security, regional relations, leadership, and foreign policy. Long-term investment and the Sustainable Company: a stakeholder perspective. Vol. III Sigurt Vitols, 2015-09-16 The onset of the Great Financial Crisis in 2007/8 has triggered a widespread debate about the causes and the social and environmental consequences of the lack of long-term investment around the world. This volume, the third in the Sustainable Company book series produced by the GOODCORP network of academic and trade union experts on corporate governance, presents a stakeholder approach to the problem. The analysis and policy prescriptions presented here go beyond mainstream economic analysis by highlighting the need for major changes in the way resources are saved, distributed, and invested in the interests of a sustainable and just economy and society. Individual chapters explore different dimensions of the problem of short-termism and possible policy responses. Key themes in this volume include the state of the debate on long-term investment in Europe, increasing worker voice in pension fund investment, and implementing financial transaction taxes to discourage financial market speculation. Policy proposals beyond the mainstream include strengthening worker participation rights, including the right to non-financial information from companies, and using international investment treaties to support social and environmental standards. **Encyclopedia of Automotive Engineering**, 2015-03-23 Erstmal eine umfassende und einheitliche Wissensbasis und Grundlage für weiterführende Studien und Forschung im Bereich der Automobiltechnik.
