"Code of Massachusetts regulations, 2016" ,2016 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020 **Natural and Synthetic Waxes** Ernst J. Krendlinger,Uwe H. Wolfmeier,2022-10-31 Natural and Synthetic Waxes A compilation of all relevant information for the production and use of waxes in technical applications Waxes are among the oldest organic substances used by mankind Before all others beeswax is known to have played a role in human history for thousands of years But over time many other wax species have been detected and exploited and prepared for different utilizations Today we possess knowledge of a great variety of different types of waxes Unfortunately there still is no broadly accepted definition of a wax for the relatively few wax chemists waxes are usually defined by their physico chemical properties more than by their chemical constitution Waxes are not uniform but oligomeric and polymeric substances not simply describable with a chemical formula The realm of waxes encompasses fully or partly natural refined partly or fully synthetic products which can be extended by wax like products which do not fulfil all definition criteria Waxes are offered in different forms like pellets granules powders or micropowders Their number of technical applications runs into thousands However waxes in most cases are just adjuvants or additives and with few exceptions like candles not known to a broader public Only few publications over the last decades tried to present a more comprehensive overview of their chemistry chemical composition their physical and analytical properties their applications and their sometimes astonishing history Based on personal experience and expertise the authors intend to present an overview on the main classes of waxes their origin history future and potential fate Economical aspects like market size and development ecological impacts and challenges and regulatory issues are also addressed Waxes are indispensable products in everyday life and in industry and technology though mostly not even visible or distinguishable to experts They deserve more than the role of a poor cousin in chemistry and technology *Proceedings of the International Conference Theory and Applications in the Knowledge Economy TAKE 2019* Florian Kragulj,2019-07-10 Foreword Ten years is a long time In 2009 a bunch of friends gathered in Portugal for a conference that was to precede TAKE In 2011 we repeated Then after a strange sequence of events we finally organized TAKE for the first time in 2015 in Aveiro followed by Zagreb Poznan and now Vienna Florian Kragulj was in the first TAKE in Aveiro and from the start showed the highest level of enthusiasm and professionalism in the event These characteristics were kept alive during all the 15 or so months during which we organized TAKE 2019 That this edition of TAKE involves several entities linked with academia i.e. WU Vienna University of Economics and Business the Austrian Economic Chamber and the Institute for Applied Research on Skilled Crafts and Trades IAGF This in itself a big success and a sign of the Conference improvement Also we may see by analysing the papers and in particular the streams that TAKE has been following the economic times and this year we have several papers on the Gig Economy Only good conferences adjust the others get stuck in time And success in Conferences is about

teams And in TAKE that team is indeed a very large group of people including the co chairs the local organizing team the material organizers Book of Abstracts and Proceedings the stream leaders and the paper reviewers without all these persons nothing could have been done And finally we had to depend on the authors and their willingness to work with us Without the work of these large dozens of devoted and skilled people TAKE 2019 would not have existed May I also mention that this time and with Florian s impulse and skill the organization of TAKE was improved in technological terms in short we became techno we used a website to deliver the mail list a website to receive the scientific material and another website to receive the fees All these were investments that eventually paid of and that will guarantee a more stable organization for TAKE in the future And we owe it to Florian However as the Human Resource Development part of TAKE and more than anyone Gary Mc Lean would remind us We are humans Eduardo and technology helps but in the end is attention to detail capacity to deal with the bizarre and to accommodate the weirdness making sometimes the impossible possible that differentiates a good conference made doing things right from an excellent conference based in doing the right things And on this last matter believe me we in TAKE are among the best in the world because apart from being outstanding scholars and good colleagues we are an amazing group of friends and friendship is the best way to turn good conferences into outstanding ones Many thanks from the heart and enjoy the Conference Eduardo Tom Conference Chair Universidade Europeia Lisbon July 2019
