Military 2016 Intake:

Advances in the Assessment of Dietary Intake. Dale A. Schoeller, M. Westerterp, 2017-08-15 Diet is a major factor in health and disease. Controlled long term studies in humans are impractical and investigators have utilized long term epidemiological investigations to study the contributions of diet to the human condition. Such studies while valuable have often been limited by contradictory findings, a limitation secondary to systematic errors in traditional self reported dietary assessment tools that limit the percentage of variances in diseases explained by diet. New approaches are available to help overcome these limitations and *Advances in the Assessment of Dietary Intake* is focused on these advances in an effort to provide more accurate dietary data to understand human health. Chapters cover the benefits and limitations of traditional self report tools, strategies for improving the validity of dietary recall and food recording methods, objective methods to assess food and nutrient intake, assessment of timing and meal patterns using glucose sensors and physical activity patterns using validated accelerometers. *Advances in the Assessment of Dietary Intake* describes new avenues to investigate the role of diet in human health and serves as the most up to date reference and teaching tool for these methods that will improve the accuracy of dietary assessment and lay the ground work for future studies.

Aristocracy of Armed Talent Samuel Ling Wei Chan, 2019 When Singapore declared independence in 1965 it faced the monumental task of building a military from scratch

of Armed Talent tells the story of the development of the Singapore Armed Forces through a collective portrait of its leaders. This book is based on interviews with twenty-eight flag officers offering a firsthand look at Singapore's military from the very leaders who helped shape it. It addresses the challenges Singapore faced in building its officer corps and encouraging individuals to stay and make a career out of military service. In a society where the majority Chinese population traditionally devalued military careers and where military service was associated with foreign occupiers and colonizers, Singapore had to learn to build a culture of leadership for its armed forces. It also dispels some of the myths that have shrouded military culture in the country. As former flag officers are often recruited into senior civil service and political roles, understating the military elite culture is central to understanding Singapore's politics. This book provides a rare window on an exceptional and globally influential institution.
