## Downloading and Installing the MikroTik RouterOS

The download and installation process of the MikroTik RouterOS is described in the following diagram:

### 1. Download the basic installation archive file.

Depending on the desired media to be used for installing the MikroTik RouterOS please choose one of the following archive types for downloading:

- ISO image of the installation CD, if you have a CD writer for creating CDs. The ISO image is in the `MTodownload_v2-6-x_dd-mm-yyy.zip` archive file containing a bootable CD image. The CD will be used for booting up the dedicated PC and installing the MikroTik RouterOS on its hard-drive or flash-drive.
- MikroTik Disk Maker, if you want to create 3.5" installation floppies. The Disk Maker is a self-extracting archive `DiskMaker_v2-6-x_dd-mm-yyy.exe` file, which should be run on your Windows/NT/4/2K/XP workstation to create the installation floppies. The installation floppies will be used for booting up the dedicated PC and installing the MikroTik RouterOS on its hard-drive or flash-drive.
- MikroTik Disk Maker is a set of smaller files, if you have problems downloading one large file.
- Netinstall, if you want to install RouterOS over a LAN with one floppy boot disk.

**Note!** The installation from CD or network requires Full (paid) License. If you intend to obtain the Free Demo License, you should use the floppy installation media.

### 2. Create the installation media

Use the appropriate installation archive to create the installation CD or floppies.

- For the CD, write the ISO image onto a blank CD.
- For the floppies, run the Disk Maker on your Windows workstation to create the installation floppies. Follow the instructions and insert the floppies in your FDD as requested, label them as Disk 1,2,3, etc.
