Military Skills And Development System 2016:

South Africa's Post-Apartheid Military Lindy Heineken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged. HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil-military relations of countries around the world.

Handbook of Research on Character and Leadership Development in Military Schools Ryan, Mark Patrick, Weekes, Timothy L., 2021-01-22 Military academies have served youth for more than a century with proud traditions of producing graduates who are scholars, leaders and athletes who adhere to a code of honor and ethical principles as they take the knowledge, skills and dispositions gained at those academies into higher education, the business world, military service, civic endeavors and the broader workforce. There is a current gap and need for research that explores the various components of a K-20 military school, college education and how those components successfully produce leaders of character for our military, civic, academic and business worlds both in the United States and abroad. *The Handbook of Research on Character and Leadership Development in Military Schools* synthesizes research on the impact of military academies by providing a singular compendium of current academic studies on the graduates of military academies and the communities of which they enter after graduation. The chapters will explore the academics, leadership, character development, citizenship, athletics and other dimensions of both global and national and both private and public military academies. This book is ideal for current leaders, staffs, governing board members and alumni of military academies both in the United States and internationally, along with policymakers, government officials, practitioners, researchers, academicians and students interested in the implications of character and leadership development on individuals enrolled in or graduated from military schools.

[The Islamic State](#) Ondrej Filipec, 2020-03-10. This book analyzes the transformation of ISIS Daesh from an underground insurgent organization to a quasi-state entity. It traces the genesis and evolution of what may be interpreted as a revolutionary war aimed at the creation and expansion of a new society and world order in the ruins of Syria and Iraq. This book analyzes the regime's totalitarian features, including structure, ideology, propaganda, and violence. Examines its ideology with a focus on radical Islamism and Salafi jihadism. Studies the economics behind its continued existence and explores the attitude of key state and non-state actors, especially Russia, USA, and the Global Coalition towards Daesh. An indispensable guide to the study of modern terrorism, this book will be of great interest to students and researchers of Middle East studies, terrorism, with a focus on ISIS, military and strategic studies, politics, and international relations, as well as general readers.

It addresses the unique circumstances and the similarities faced by parents and children under three different institutional contexts of separation: parental migration and deportation, parental incarceration, and parental military deployment. Chapters describe the difficulties faced by families in each of these circumstances, along with the challenges in conducting research under the multidimensional and dynamic complexities of parent-child separation. Finally, the volume offers recommendations for creating supportive structures and interventions for families facing separation that can bolster youth well-being in childhood and beyond. Featured areas of coverage include Parental migration, Parental incarceration, Parental military deployment, Undocumented migration and deportation, Child-parent relationship, and child resilience, and

African Peace Militaries David Francis,2017-08-16 This book provides a critical understanding of the emerging role of African militaries in peacetime democratic Africa This book departs from the dominant perspective which simply presents the military as an enemy of democracy because of the history and legacy of unending military coup d tats and interventions in civilian politics In the context of Africa the military has been blamed or largely held responsible for instigating wars armed conflicts political violence poverty and underdevelopment due to bad governance and mismanagement of the state Drawing from diverse case studies across Africa including Nigeria Rwanda Uganda Ethiopia and Egypt this volume presents the argument that though the military has played a negative and sometimes destructive role in undermining constitutional rule and the overthrow of democratic civilian governments the same military now operating in a changed global environment is making effort to support the development of democracy and democratic consolidation as well as remain subjected to civilian democratic oversight and control Notwithstanding the real challenge for this emerging trend of African peace militaries is the extent to which they are able to fulfil on a predictable and consistent basis their constitutional mandate to defend the people against elected autocrats in Africa who try to use the military to perpetuate themselves in power This work fills a critical gap in the literature and will be of much interest to students of African security and politics peace and conflict studies security studies and IR in general *"Code of Massachusetts regulations, 2016"*
