**Multimodal Teaching and Learning** Gunther Kress,Carey Jewitt,Jon Ogborn,Tsatsarelis Charalampos,2001-10-04 Multimodal Teaching and Learning The Rhetorics of the Science Classroom achieves the rare goal of explicating multimodality as both theory and practice This is an importantly concrete analysis derived from extended careful and interdisciplinary observation which challenges our thinking about how meaning and knowledge are shaped by our modes of communication The book appeals to a wide range of scholars and practitioners far beyond the science classroom Professor Ron Scollon Department of Linguistics Georgetown University This book takes a radically different look at communication and in doing so presents a series of challenges to accepted views on language on communication on teaching and above all on learning Drawing on extensive research in science classrooms it presents a view of communication in which language is not necessarily communication image gesture speech writing models spatial and bodily codes The action of students in learning is radically rethought all participants in communication are seen as active transformers of the meaning resources around them and this approach opens a new window on the processes of learning

Advances in Intelligent Tutoring Systems Roger Nkambou,Riichiro Mizoguchi,Jacqueline Bourdeau,2010-09-21 May the Forcing Functions be with You The Stimulating World of AIED and ITS Research It is my pleasure to write the foreword for

Advances in Intelligent Tutoring Systems This collection with contributions from leading researchers in the field of artificial intelligence in education AIED constitutes an overview of the many challenging research problems that must be solved in order to build a truly intelligent tutoring system ITS The book not only describes some of the approaches and techniques that have been explored to meet these challenges but also some of the systems that have actually been built and deployed in this effort As discussed in the Introduction Chapter 1 the terms AIED and ITS are often used interchangeably and there is a large overlap in the researchers devoted to exploring this common field In this foreword I will use the term AIED to refer to the search area and the term ITS to refer to the particular kind of system that AIED researchers build It has often been said that AIED is AI complete in that to produce a tutoring system as sophisticated and effective as a human tutor requires solving the entire gamut of artificial intelligence research AI problems

Understanding and Developing Science Teachers' Pedagogical Content Knowledge John Loughran, Amanda Berry, Pamela Mulhall, 2012-07-31 There has been a growing interest in the notion of a scholarship of teaching Such scholarship is displayed through a teacher's grasp of and response to the relationships between knowledge of content teaching and learning in ways that attest to practice as being complex and interwoven Yet attempting to capture teachers' professional knowledge is difficult because the critical links between practice and knowledge for many teachers is tacit Pedagogical Content Knowledge PCK offers one way of capturing articulating and portraying an aspect of the scholarship of teaching and in this case the scholarship of science teaching The research underpinning the approach developed by Loughran Berry and Mulhall offers access to the development of the professional knowledge of science teaching in a form that offers new ways of sharing and disseminating this knowledge Through this Resource Folio approach comprising CoRe and PaP eRs a recognition of the value of the specialist knowledge and skills of science teaching is not only highlighted but also enhanced The CoRe and PaP eRs methodology offers an exciting new way of capturing and portraying science teachers' pedagogical content knowledge so that it might be better understood and valued within the profession This book is a concrete example of the nature of scholarship in science teaching that is meaningful useful and immediately applicable in the work of all science teachers preservice in service and science teacher educators It is an excellent resource for science teachers as well as a guiding text for teacher education Understanding teachers' professional knowledge is critical to our efforts to promote quality classroom practice While PCK offers such a lens the construct is abstract In this book the authors have found an interesting and engaging way of making science teachers' PCK concrete useable and meaningful for researchers and teachers alike It offers a new and exciting way of understanding the importance of PCK in shaping and improving science teaching and learning Professor Julie Gess Newsome Dean of the Graduate School of Education Willamette University This book contributes to establishing CoRes and PaP eRs as immensely valuable tools to illuminate and describe PCK The text provides concrete examples of CoRes and PaP eRs completed in real life teaching situations that make stimulating reading The authors show practitioners and researchers alike how this
