Nostalgic Design William C. Kurlinkus, 2019-01-09 Nostalgic Design presents a rhetorical analysis of twenty first century nostalgia and a method for designers to create more inclusive technologies Nostalgia is a form of resistant commemoration that can tell designers what users value about past designs why they might feel excluded from the present and what they wish to recover in the future By examining the nostalgic hacks of several contemporary technical cultures from female software programmers who knit on the job to anti vaccination parents Kurlinkus argues that innovation without

tradition will always lead to technical alienation whereas carefully examining and layering conflicting nostalgic traditions can lead to technological revolution
