LET'S LEARN MORE ABOUT PLAINS

Grasslands are places where grass is the main type of plant life.

I'm hungry!

A plain is a large, flat area of land. Plains are common landforms and are found on every continent, covering more than one third of the world's land. Sometimes called **grasslands** and **prairies**, plains are important for farming because the land is flat, there are few trees, and the dirt is healthy for planting seeds.

Some plains are formed by **erosion**. As ice and water send bits of dirt **back** down hillsides, the **sediment** settles in lower areas. Over time, plains form.
